Risk Disclaimer: OTC leveraged products, including CFDs, are complex investments, which come with a high risk of losing money rapidly due to leverage. You acknowledge that trading derivative financial instruments, including foreign exchange, futures, options, contracts for differences and commodities carry a substantial potential risk of loss and you understand the risks involved and that you are willing to undertake this risk. You further confirm your understanding that the value of these financial instruments is influenced by the price changes of their underlying reference instruments, that these prices may fluctuate both rapidly and widely, that such factors can be neither predicted nor controlled by any party, and that leverage, or "gearing" will disproportionately impact the results of any such transactions. Losses can therefore quickly compound. You will be responsible to ensure your account has sufficient margin to sustain your trading activity. You should consider carefully whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.
